

CyberSource Endpoints

This document provides information about the endpoints to use when sending an API request message to CyberSource.

Endpoints for the Simple Order API

Note

In the URLs in this section, *1.x* is not a placeholder for the version number but an integral part of the URL.

The domain for live transactions using the Simple Order API is `ics2wsa.ic3.com`. For live transactions, send requests to the production URL:

<https://ics2wsa.ic3.com/commerce/1.x/transactionProcessor>

The domain for test transactions using the Simple Order API is `ics2wstesta.ic3.com`. For test transactions, send requests to the test URL:

<https://ics2wstesta.ic3.com/commerce/1.x/transactionProcessor>

The XML schema for the Simple Order API is at the same location as the production URL:

<https://ics2wsa.ic3.com/commerce/1.x/transactionProcessor>

The following domains have been deprecated:

- `ics2ws.ic3.com`
- `ics2wstest.ic3.com`

Endpoints for the SCMP API

For live transactions, send requests to the production server:

<http://ics2a.ic3.com>

For test transactions, send requests to the test server:

<http://ics2testa.ic3.com>

The following domains have been deprecated:

- ics2.ic3.com
- ics2test.ic3.com
