

Processor Names

Many CyberSource reports include a payment processor value:

- In XML reports, the name of the element is usually `<PaymentProcessor>`.
- In CSV reports, the name of the field is usually `payment_processor`.

In most reports, a payment processor value is a raw, unmapped value from the CyberSource software. A few reports use mapped payment processor values. For information about the main CyberSource reports, see the [Reporting Developer Guide](#).

Raw Payment Processor Names

Table 1 Raw Payment Processor Names

Raw Name	Processor
aibms	AIBMS
amexbrighton	American Express Brighton
amexbrighton2	American Express Brighton
