About This Guide

Audience and Purpose

This guide is written for merchants who want to offer the Paymentech Direct Debit services to customers. This guide describes tasks a merchant must complete in order to process direct debit validate requests, direct debit transactions, and direct debit refund transactions.

Conventions

Note and Important Statements

A Note contains helpful suggestions or references to material not contained in the document.

An Important statement contains information essential to successfully completing a task or learning a concept.
Text and Command Conventions

- DE = Germany
- ES = Spain
- FI = Finland
- FR = France
- GB = Great Britain
- GR = Greece
- IE = Ireland
- IT = Italy
- LU = Luxembourg
- MC = Monaco
- MT = Malta
- NL = Netherlands
- PT = Portugal
- SI = Slovenia
- SK = Slovak Republic
Chapter 1 Introduction to the Direct Debit Services

Transaction Endpoints

For live transactions, send requests to the production URL:
http://ics2a.ic3.com

For test transactions, send requests to the test URL:
http://ics2testa.ic3.com

Testing Responses

You can simulate the CyberSource response messages by requesting direct debit services with amounts that trigger specific response messages. These triggers work only on the test server, not on the production server.

For direct debit and direct debit refund trigger amounts and responses see SCMP API Testing Information page.

Reporting

Contact Chase Paymentech to learn how to configure your account for the PDE-0022 report. This report returns chargeback or reversal updates for direct debits into the CyberSource Payment Events report. For information regarding the Payment Events report, see the Reporting Developer Guide (PDF | HTML).

For direct debit funding updates relating to reconciliation, contact Chase Paymentech Solutions.
SEPA Direct Debits

Standalone Direct Debit Services

Direct Debit Validation

Direct debit validation does not include negative files, availability of funds, or account status. If the bank account information is valid, the transaction is submitted to the country’s direct debit clearing system for collection.

To request a direct debit validation including the IBAN:

Step 1

Include the following fields in the request.

Example 1 Direct Debit Validate Request including the IBAN

ics_applications=ics_direct_debit_validate
merchant_id=dd_test
merchant_ref_number=testmerchrefnu
customer_firstname=Bob
customer_lastname=smith
bill_address1=1 Test way
bill_city=Vienna
bill_country=Austria
bank_country=AT
bank_iban=AT611904300234573201
bank_swiftcode=RVSAAT2S024
customer_email@example@example.com
direct_debit_mandate_authentication_date=20150909
direct_debit_recurring_type=1
mandate_id=1234567899
grand_total_amount=50.00
currency=EUR
Below are the transaction reply fields.

**Example 2  Direct Debit Validate Reply**

direct_debit_validate_trans_ref_no=02WNTRG000000IE49QL2C
direct_debit_validate_time=2015-09-10T141603Z
direct_debit_validate_amount=50.00
direct_debit_validate_response_code=100
direct_debit_validate_rflag=SOK
direct_debit_validate_rmsg=Request was processed successfully
direct_debit_validate_rcode=1
direct_debit_validate_iban=AT611904300234573201
direct_debit_validate_bank_swift_code=RVSAAT2S024
ics_rcode=1
ics_rmsg=Request was processed successfully.
ics_rflag=SOK
request_id=4418945624900170574175
currency=eur
merchant_ref_number=testmerchrefnu

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

---

**To request a direct debit validation including the BBAN:**

**Step 1** Include the fields in Example 1, page 12.

**Step 2** Replace the `bank_iban` and the `bank_swiftcode` request fields with the BBAN request fields below.

**Example 3  BBAN Request Fields**

bank_account_number=1234568
bank_code=12345678

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.
Chapter 2  Requesting Direct Debit Services

Direct Debit

To request a direct debit including the IBAN:

**Step 1** Include the following fields in the request.

**Example 4  Direct Debit Request including the IBAN**

```plaintext
ics_applications=ics_direct_debit
merchant_id=dd_test
merchant_ref_number=testmerchrefnu
customer_firstname=Bob
customer_lastname=smith
bill_address1=1 Test way
bill_city=Vienna
bill_country=Austria
bank_country=AT
bank_iban=AT611904300234573201
bank_swiftcode=RVSAAT2S024
customer_email=example@example.com
direct_debit_mandate_authentication_date=20150909
direct_debit_recurring_type=1
mandate_id=1234658799
grand_total_amount=50.00
currency=EUR
```

Below are the transaction reply fields.

**Example 5  Direct Debit Request Reply**

```plaintext
direct_debit_time=2015-09-10T141803Z
direct_debit_amount=50.00
direct_debit_trans_ref_no=02WWNTLG000000IE49ZCRY
direct_debit_rmsg=Request was processed successfully.
direct_debit_rcode=1
direct_debit_rflag=SOK
ics_rcode=1
ics_rflag=SOK
ics_rmsg=Request was processed successfully.
request_id=4418946831850170574175
currency=eur
merchant_ref_number=testmerchrefnu
```

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.
To request a direct debit including the BBAN:

Step 1 Include the fields in Example 4, page 14.

Step 2 Replace the bank_iban and the bank_swiftcode request fields with the BBAN request fields below.

Example 6   BBAN Request Fields

<table>
<thead>
<tr>
<th>Field</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>bank_account_number</td>
<td>1234568</td>
</tr>
<tr>
<td>bank_code</td>
<td>12345678</td>
</tr>
</tbody>
</table>

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

Direct Debit Refund

To request a direct debit refund including the IBAN:

Step 1 Include the following fields in the request.

Example 7   Direct Debit Refund Request including the IBAN

<table>
<thead>
<tr>
<th>Field</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>ics_applications</td>
<td>ics_direct_debit_refund</td>
</tr>
<tr>
<td>merchant_id</td>
<td>dd_test</td>
</tr>
<tr>
<td>merchant_ref_number</td>
<td>testmerchrefnu</td>
</tr>
<tr>
<td>customer_firstname</td>
<td>Bob</td>
</tr>
<tr>
<td>customer_lastname</td>
<td>smith</td>
</tr>
<tr>
<td>bill_address1</td>
<td>1 Test way</td>
</tr>
<tr>
<td>bill_city</td>
<td>Vienna</td>
</tr>
<tr>
<td>bill_country</td>
<td>Austria</td>
</tr>
<tr>
<td>bank_country</td>
<td>AT</td>
</tr>
<tr>
<td>bank_iban</td>
<td>AT611904300234573201</td>
</tr>
<tr>
<td>bank_swiftcode</td>
<td>RVSAAT2S024</td>
</tr>
<tr>
<td>customer_email</td>
<td><a href="mailto:example@example.com">example@example.com</a></td>
</tr>
<tr>
<td>direct_debit_mandate_authentication_date</td>
<td>20150909</td>
</tr>
<tr>
<td>direct_debit_recurring_type</td>
<td>1</td>
</tr>
<tr>
<td>mandate_id</td>
<td>1234658799</td>
</tr>
<tr>
<td>grand_total_amount</td>
<td>50.00</td>
</tr>
<tr>
<td>currency</td>
<td>EUR</td>
</tr>
</tbody>
</table>
Below are the transaction reply fields.

**Example 8   Direct Debit Refund Reply**

```
direct_debit_refund_time=2015-09-10T142248Z
direct_debit_refund_trans_ref_no=02WNYTKG000000IE49ZAAA
direct_debit_refund_rflag=SOK
direct_debit_refund_rmsg=Request was processed successfully
direct_debit_refund_rcode=1
direct_debit_refund_amount=50.00
ics_rflag=SOK
ics_rcode=1
ics_rmsg=Request was processed successfully.
request_id=4418949672590170574175
currency=eur
merchant_ref_number=testmerchrefnu
```

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

---

**To request a direct debit refund including the BBAN:**

**Step 1**  Include the fields in Example 7, page 15.

**Step 2**  Replace the `bank_iban` and the `bank_swiftcode` request fields with the BBAN request fields below.

**Example 9   BBAN Request Fields**

```
bank_account_number=1234568
bank_code=12345678
```

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.
Follow-On Direct Debit Services

Direct Debit

To request a follow-on direct debit:

Step 1 Include the following fields in the request.

Example 10 Follow-On Direct Debit Request

ics_applications=ics_direct_debit
validate_request_id=4418986822850170574175
merchant_id=dd_test
merchant_ref_number=testmerchrefnu
customer_firstname=Bob
customer_lastname=smith
bill_address1=1 Test way
bill_city=Vienna
bill_country=Austria
bank_country=AT
bank_iban=AT611904300234573201
bank_swiftcode=RVSAAT2S024
customer_email@example@example.com
direct_debit_mandate_authentication_date=20150909
direct_debit_recurring_type=1
mandate_id=1234658799
grand_total_amount=50.00
currency=EUR

Important

The validate_request_id field must be set to the request_id value that is returned from the original direct debit validate request.

Below are the transaction reply fields.

Example 11 Follow-On Direct Debit Reply

direct_debit_time=2015-09-10T152458Z
direct_debit_amount=50.00
direct_debit_trans_ref_no=02WYNTRG0000000IE49QM6Z
direct_debit_rmsg=Request was processed successfully
direct_debitrcode=1
direct_debitrflag=SOK
icsrcode=1
Chapter 2  Requesting Direct Debit Services

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

Direct Debit Refund

To request a follow-on direct debit refund:

Step 1  Include the following fields in the request.

Example 12  Follow-On Direct Debit Refund Request

ics_applications=ics_direct_debit_refund
direct_debit_request_id=4418986822850170574175
merchant_id=dd_test
merchant_ref_number=testmerchrefnu
customer_firstname=Bob
customer_lastname=smith
bill_address1=1 Test way
bill_city=Vienna
bill_country=Austria
bank_country=AT
bank_iban=AT611904300234573201
bank_swiftcode=RVSAAT2S024
customer_email=example@example.com
direct_debit_mandate_authentication_date=20150909
direct_debit_recurring_type=1
mandate_id=1234658799
grand_total_amount=50.00
currency=EUR

The direct_debit_request_id field must be set to the request_id value that is returned from the original direct debit request.
Below are the transaction reply fields.

**Example 13  Follow-On Direct Debit Refund Reply**

```
direct_debit_refund_time=2015-09-10T152749Z
direct_debit_refund_trans_ref_no=02WWTBG000000IE49PBGU
direct_debit_refund_rflag=SOK
direct_debit_refund_rcode=1
direct_debit_refund_rmsg=Request was processed successfully
direct_debit_refund_amount=50.00
direct_debit_refund_rmsg=Request was processed successfully.
ics_rflag=SOK
ics_rcode=1
ics_rmsg=Request was processed successfully.
request_id=4418988690300170574175
currency=eur
merchant_ref_number=testmerchrefnu
```

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

**Direct Debit Void**

**To request a follow-on direct debit void:**

**Step 1** Include the following fields in the request.

**Example 14  Follow-On Direct Debit Void**

```
ics_applications=ics_void
void_request_id=4419575367615000001521
merchant_ref_number=testmerchrefnu
merchant_id=dd_test
```

The `void_request_id` field must be set to the `request_id` value that is returned from the original direct debit request.
Below are the transaction reply fields.

**Example 15  Direct Debit Void Reply**

```plaintext
void_void_request_time=2015-09-11T080259Z
void_void_currency=eur
void_void_amount=50.00
void_rmsg=Request was processed successfully.
void_rcode=1
void_rflag=SOK
ics_rcode=1
ics_rmsg=Request was processed successfully.
ics_rflag=SOK
request_id=4419585779580171399324
currency=EUR
merchant_ref_number=testmerchrefnu
```

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

---

**Direct Debit Refund Void**

To request a follow-on direct debit refund void:

**Step 1** Include the following fields in the request.

**Example 16  Follow-On Direct Debit Refund Void**

```plaintext
ics_applications=ics_void
void_request_id=4419575367615000001521
merchant_ref_number=testmerchrefnu
merchant_id=dd_test
```

The `void_request_id` field must be set to the `request_id` value that is returned from the original direct debit refund request.
Below are the transaction reply fields.

**Example 17  Direct Debit Refund Void Reply**

```plaintext
void_void_request_time=2015-09-11T080259Z
void_void_currency=eur
void_void_amount=50.00
void_rcode=1
void_rmsg=Request was processed successfully.
void_rflag=SOK
request_id=4419585779580171399324
currency=EUR
ics_rflag=SOK
ics_rcode=1
ics_rmsg=Request was processed successfully.
merchant_ref_number=testmerchrefnu
```

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.
UK Domestic Direct Debits (BACS)

Based on the BACS (Bankers’ Automated Clearing Services) Automated Direct Debit Instruction Service (AUDDIS), U.K. merchants must lodge the direct debit mandate prior to a direct debit deposit. This process requires the biller to send a pre-notification to the payer at least five calendar days before collecting the payment from the payer’s account.

Direct Debit Mandate Lodgement

To lodge a UK direct debit mandate:

**Step 1** Include the following fields in the request.

**Example 18** UK Direct Debit Mandate Lodgement

```plaintext
ics_applications=ics_direct_debit
merchant_id=dd_test
merchant_ref_number=testmerchrefnu
customer_firstname=Bob
customer_lastname=smith
bill_address1=1 Test way
bill_city=London
bill_country=United Kingdom
bank_country=GB
bank_account_number=12345645
bank_code=123456
customer_email=example@example.com
direct_debit_mandate_authentication_date=20150909
direct_debit_recurring_type=5
mandate_id=1234658799
prenote_transaction=1
grand_total_amount=0
currency=GBP
```

**Important**

The `prenote_transaction` field must be set to 1 to indicate that the request is to lodge a direct debit mandate and is not a direct debit request. The `grand_total_amount` field must be set to 0 and the `direct_debit_recurring_type` field must be set to 5, 6, or 7.
Chapter 2  Requesting Direct Debit Services

Below are the transaction reply fields.

Example 19  Direct Debit Mandate Lodgement Reply

direct_debit_time=2015-09-14T073013Z
direct_debit_amount=0.00
direct_debit_trans_ref_no=02WNTQG0000000IE49UU40
direct_debit_rmsg=Request was processed successfully
direct_debit_rcode=1
direct_debit_rflag=SOK
currency=gbp
ics_rflag=SOK
ics_rcode=1
ics_rmsg=Request was processed successfully.
request_id=4422158122250170574238
merchant_ref_number=testmerchrefnu

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.

Direct Debit

To request a UK direct debit:

Step 1  Include the following fields in the request.

Example 20  UK Direct Debit Request

icsApplications=ics_direct_debit
merchant_id=dd_test
merchant_ref_number=testmerchrefnu
customer_firstname=Bob
customer_lastname=smith
bill_address1=1 Test way
bill_city=London
bill_country=United Kingdom
bank_country=GB
bank_account_number=12345645
bank_code=123456
customer_email=example@example.com
direct_debit_mandate_authentication_date=20150909
direct_debit_recurring_type=1
mandate_id=1234658799
grand_total_amount=50.00
currency=GBP
Chapter 2  Requesting Direct Debit Services

Below are the transaction reply fields.

Example 21  Direct Debit Mandate Lodgement Reply

direct_debit_time=2015-09-14T083859Z
direct_debit_amount=50.00
direct_debit_trans_ref_no=02WNYTKG000000001EGB7PA
direct_debit_rmsg=Request was processed successfully
direct_debit_rcode=1
direct_debit_rflag=SOK
currency=gbp
ics_rflag=SOK
ics_rcode=1
ics_rmsg=Request was processed successfully.
request_id=4422199389180170574238
merchant_ref_number=testmerchrefnu

For detailed descriptions of all request fields see page 26 and for reply fields see page 36.
SCMP API Fields

Formatting Restrictions

Unless otherwise noted, all of the fields listed are order and case insensitive, and the fields accept special characters, such as @, #, and %.

Request-level and offer-level field names and values must not contain carets (^) or colons (:). However, they can contain embedded spaces and any other printable characters. If you use more than one consecutive space, the extra spaces will be removed.

Data Type Definitions

- **Date and time**—The format is YYYY-MM-DDThh:mm:ssZ. For example, 2002-08-11T22:47:57Z is equal to August 11, 2002, at 10:47:57 P.M. The T separates the date and the time. The Z indicates Coordinated Universal Time (UTC), which is also known as Greenwich Mean Time.

- **Decimal**—Number that includes a decimal point. Examples: 23.45, -0.1, 4.0, 90809.0468.

- **Integer**—Whole number {..., -3, -2, -1, 0, 1, 2, 3, ...}.

- **Non-negative integer**—Whole number greater than or equal to zero {0, 1, 2, 3, ...}.

- **Positive integer**—Whole number greater than zero {1, 2, 3, ...}.

- **String**—Sequence of letters, numbers, spaces, and special characters, such as @ and #.
# Request Fields

## Table 4  Request-Level Fields for the SCMP API

<table>
<thead>
<tr>

### Table 4  Request-Level Fields for the SCMP API (Continued)

<table>
<thead>
<tr>
<th>Request Field</th>
<th>Description</th>
<th>Required (R) or Optional (O)</th>
<th>Data Type &amp; Length</th>
</tr>
</thead>
</table>
| direct_debit_request_token    | The request_token value returned from a previous request for the ics_direct_debit service.  
The field is an encoded string that contains no confidential information, such as an account number or card verification number. The string can contain a maximum of 256 characters.  
For more information about request tokens, see *Getting Started with CyberSource Advanced for the SCMP API*. | Refund (O for follow-on refunds. Not used for standalone refunds.) | String (256)       |
| grand_total_amount            | Grand total for the order. You must include either this field or the amount offer-level field in your request. For more information about offers and grand totals, see *Getting Started with CyberSource Advanced for the SCMP API*.  
**Note**  Required for lodging a UK direct debit mandate, and the value must be set to 0. See "Direct Debit Mandate Lodgement," page 22. | Validate (See description)  
Direct Debit (See description)  
Refund (See description)       | Integer (12)                           |
| ics_applications              | CyberSource services to process the request.                                                                                                                                                                  | Validate (R)  
Direct Debit (R)  
Refund (R)       | String (255)                           |
| link_to_request               | Value that links the current request to a previous authorization request for a debit card or prepaid card. This value is useful when using multiple payment methods to complete an order. For details, see the information about partial authorizations in *Credit Card Services Using the SCMP API*. | Direct Debit (O) | String (26)       |
| mandate_id                    | The unique identification reference for the direct debit mandate.  
**Important**  Required for lodging a UK direct debit mandate; otherwise it is optional. See "Direct Debit Mandate Lodgement," page 22. | Direct Debit (See description)  
Direct Debit Refund (See description)       | String (35)       |
| merchant_id                   | Your CyberSource merchant ID.                                                                                                                                                                                 | Validate (R)  
Direct Debit (R)  
Refund (R)       | String (30)                           |
## SCMP API Fields

### merchant_ref_number
Merchant-generated order reference or tracking number.

**Important** Do not use the following symbols in this value: pipe (|), caret (^), percent symbol (%), backslash (\), forward slash (/).

<table>
<thead>
<tr>
<th>Request Field</th>
<th>Description</th>
<th>Required (R) or Optional (O)</th>
<th>Data Type &amp; Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>merchant_ref_number</td>
<td>Merchant-generated order reference or tracking number.</td>
<td>Validate (R) Direct Debit (R) Refund (R)</td>
<td>String (22)</td>
</tr>
</tbody>
</table>

### order_request_token
The request token value returned from a previous request. This value links the previous request to the current follow-on request. This field is an encoded string that does not contain any confidential information, such as account numbers or card verification numbers. The string can contain a maximum of 256 characters.

For more information about request tokens, see *Getting Started with CyberSource Advanced for the SCMP API*.

<table>
<thead>
<tr>
<th>Request Field</th>
<th>Description</th>
<th>Required (R)</th>
<th>Data Type &amp; Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>order_request_token</td>
<td>The request token value returned from a previous request. This value links the previous request to the current follow-on request. This field is an encoded string that does not contain any confidential information, such as account numbers or card verification numbers. The string can contain a maximum of 256 characters.</td>
<td>Debit (R for follow-on direct debits. Not used for standalone direct debits.) Refund (R for follow-on refunds. Not used for standalone refunds.)</td>
<td>String (256)</td>
</tr>
</tbody>
</table>

### prenote_transaction
Indicates whether the merchant intends to perform a pre-note transaction and to forward mandate information to the issuer. Based on the BACS Automated Direct Debit Instruction Service (AUDDIS), U.K. merchants have to lodge the mandate ID prior to a direct debit deposit. The process requires the biller to send a notification to the payer at least five calendar days before collecting the payment.

The possible values are:
- yes: include pre-note transaction in your request.
- no: do not include pre-note transaction in your request.

**Important** You must include the `prenote_transaction` field in your request and set the `grand_total_amount` value to 0. See "Direct Debit Mandate Lodgement," page 22.

<table>
<thead>
<tr>
<th>Request Field</th>
<th>Description</th>

</tbody>
</table>
### Appendix A

#### SCMP API Fields

**Offer-Level Fields**

**Table 5** Offer-Level Fields

<table>
<thead>
<tr>
<th>Offer-Level Field</th>
<th>Description</th>
<th>Required (R) or Optional (O)</th>
<th>Data Type &amp; Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>amount</td>
<td>Per-item price of the product. You must include either the offer0 and this field or the request-level field grand_total_amount in your request. This value cannot be negative. For more information about offers and grand totals, see Getting Started with CyberSource Advanced for the SCMP API. You can include a decimal point (.) in this field, but you cannot include any other special characters. The amount will be truncated to the correct number of decimal places.</td>
<td>Validate (See description) Direct Debit (See description) Refund (See description)</td>
<td>Integer (12)</td>
</tr>
<tr>
<td>merchant_product_sku</td>
<td>Product identifier code. Required if product_code is not the default value, stored_value, or one of the values related to shipping or handling.</td>
<td>Validate (O) Direct Debit (O) Refund (O)</td>
<td>String (30)</td>
</tr>
</tbody>
</table>
### Table 5  Offer-Level Fields (Continued)

<table>
<thead>
<tr>
<th>Offer-Level Field</th>
<th>Description</th>
<th>Required (R) or Optional (O)</th>
<th>Data Type &amp; Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>product_code</td>
<td>Type of product. This value is also used to determine the product category (electronic, handling, physical, service, or shipping). The default value is default. See &quot;Product Codes,&quot; page 41, for the valid values. If you set this field to a value other than default, stored_value, or any of the values related to shipping or handling, the quantity, product_name, and merchant_product_sku fields are required. For more information about required offer-level fields, see Getting Started with CyberSource Advanced for the SCMP API.</td>
<td>Validate (O) Direct Debit (O) Refund (O)</td>
<td>String (30)</td>
</tr>
<tr>
<td>product_name</td>
<td>Product's name. Required if product_code is not default, stored_value, or one of the values related to shipping or handling.</td>
<td>Validate (O) Direct Debit (O) Refund (O)</td>
<td>String (30)</td>
</tr>
<tr>
<td>quantity</td>
<td>Quantity of the product being purchased. The default is 1. Required if product_code is not default, stored_value, or one of the values related to shipping and/or handling.</td>
<td>Validate (O) Direct Debit (O) Refund (O)</td>
<td>Integer (10)</td>
</tr>
<tr>
<td>tax_amount</td>
<td>Tax amount associated with this item. The field is additive. For example, if you send the following offer line fields: offer0=amount:10.00^quantity:1^tax_amount:0.80 offer1=amount:20.00^quantity:1^tax_amount:1.60 the total amount authorized will be for 32.40, not 30.00 with 2.40 of tax included. The amount field and the tax_amount field must be in the same currency. If you include the tax_amount field, and you also include the ics_tax service in your request, the ics_tax service will not calculate tax for the item. Instead, it will return the value in the tax_amount field.</td>
<td>Validate (O) Direct Debit (O) Refund (O)</td>
<td>String (15)</td>
</tr>
</tbody>
</table>

<tr>
<td>direct_debit_validate_amount</td>
<td>The amount sent in the direct debit validate request in either grand_total_amount or the amount field for offer0.</td>
<td>Validate</td>
<td>String (15)</td>
</tr>
<tr>
<td>direct_debit_validate_bank_swift_code</td>
<td>Bank's SWIFT code. Unique address of the bank. Also known as the Bank Identification Code (BIC).</td>
<td>Validate</td>
<td>String (11)</td>
</tr>
<tr>
<td>direct_debit_validate_iban</td>
<td>International Bank Account Number (IBAN).</td>
<td>Validate</td>
<td>String (34)</td>
</tr>
</tbody>
</table>
| direct_debit_validate_rcode | One-digit code that indicates if the ics_direct_debit_validate request was successful:  
-1: An error occurred.  
0: The request was declined.  
1: The request was successful. | Validate | Integer (1) |
| direct_debit_validate_request_time | Time the direct debit validate was requested. The format is YYYY-MM-DDThhmmssZ. For example, 2006-08-11T224757Z is equal to August 11, 2006, at 10:47:57 P.M. The T separates the date and the time. The Z indicates Coordinated Universal Time (UTC), also known as Greenwich Mean Time. | Validate | Date and time (20) |
| direct_debit_validate_response_code | Response code from the processor. | Validate | String (10) |
### Table 6  Reply Fields for the SCMP API (Continued)

<table>
<thead>
<tr>
<th>Reply Field</th>
<th>Description</th>
<th>Returned By</th>
<th>Data Type &amp; Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>direct_debit_validate_rflag</td>
<td>One-word description of the result for the ics_direct_debit_validate request. See &quot;Reply Flags,&quot; page 40, for the possible values.</td>
<td>Direct Debit</td>
<td>String (50)</td>
</tr>
<tr>
<td>direct_debit_validate_rmsg</td>
<td>Message that explains direct_debit_validate_rflag.</td>
<td>Direct Debit</td>
<td>String (255)</td>
</tr>
<tr>
<td>direct_debit_validate_trans_ref_no</td>
<td>Reference number you can use to track the transaction.</td>
<td>Validate</td>
<td>String (22)</td>
</tr>
</tbody>
</table>
| ics_code | One-digit code that indicates if the entire request was successful:  
-1: An error occurred.  
0: The request was declined.  
1: The request was successful. | Validate  
Direct Debit  
Refund | Integer (1) |
| ics_rflag | One-word description of the result for the entire request. See "Reply Flags," page 40, for the possible values. | Validate  
Direct Debit  
Refund | String (50) |
| ics_rmsg | Message that explains ics_rflag. | Validate  
Direct Debit  
Refund | String (255) |
| merchant_ref_number | Order reference or tracking number that you provided in the request. If you included multi-byte characters in this field in the request, the returned value might contain corrupted characters. | Validate  
Direct Debit  
Refund | String (50) |
| request_id | Identifier for the request. | Validate  
Direct Debit  
Refund | String (26) |
| request_token | Request token data created by CyberSource for each reply. The field is an encoded string that contains no confidential information such as an account or card verification number. The string can contain a maximum of 256 characters.  
For more information about request tokens, see Getting Started with CyberSource Advanced for the SCMP API. | Validate  
Direct Debit  
Refund | String (256) |

Appendix A

SCMP API Fields

Reply Flags

Important

CyberSource reserves the right to add new reply flags at any time. Your system must be able to process these new reply flags.

A reply flag is associated with an entire request or a specific service:

- **Entire request**—the flag is in the `ics_rflag` field with a message in the `ics_rmsg` field.
- **Individual service**—the flag is in the `<service>_rflag` field with a message in the `<service>_rmsg` field.

<table>
<thead>
<tr>
<th>Table 7</th>
<th>Reply Flags</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Reply Flag</strong></td>
<td><strong>Description</strong></td>
</tr>
</tbody>
</table>
| DCARDREFUSED | The bank declined the transaction.  
  Note Declines can be due to insufficient funds, which cannot be determined during validation. | Validate  
  Direct Debit  
  Refund |
| DINVALIDDATA | Data provided is not consistent with the request. | Validate  
  Direct Debit  
  Refund |
| ESYSTEM | System error. Wait a few minutes before re-sending your request. You must design your transaction management system to correctly handle CyberSource system errors. The error may indicate a valid CyberSource system error or a processor rejection due to invalid data. In either case, CyberSource recommends that you do not design your system to endlessly retry sending a transaction. See the documentation for your CyberSource client for information on handling system errors and retries.  
  Note If you receive the ESYSTEM flag in your reply along with the following error message, your system's clock is incorrect. You must adjust your system's clock for your time zone; otherwise your transactions will be rejected.  
  Error message: The request ID generated by your client is incorrect because your system's clock does not match your local time. Please adjust your system's clock to your local time, and resend your request. | Validate  
  Direct Debit  
  Refund |
| SOK | The transaction was successful. | Validate  
  Direct Debit  
  Refund |
To specify a product code for the item that the customer is buying, use the product code request field with one of the values in the following table. If you do not specify a product code, CyberSource uses default. The field name is product_code.

Table 8   Product Codes

<table>
<thead>
<tr>
<th>Product Code</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>adult_content</td>
<td>Adult content.</td>
</tr>
<tr>
<td>default</td>
<td>Default value for the product code. CyberSource uses default when a request provides no value for the product code.</td>
</tr>
<tr>
<td>electronic_good</td>
<td>Electronic product other than software.</td>
</tr>
<tr>
<td>electronic_software</td>
<td>Software distributed electronically rather than on tapes, disks, or other media.</td>
</tr>
<tr>
<td>gift_certificate</td>
<td>Gift certificate not issued with CyberSource Stored Value Services.</td>
</tr>
<tr>
<td>handling_only</td>
<td>Separate charge that is generally a fee imposed by the seller on the customer. The fee pays for the seller’s administrative selling costs.</td>
</tr>
<tr>
<td>service</td>
<td>Service that you perform for the customer.</td>
</tr>
<tr>
<td>shipping_and_handling</td>
<td>Shipping is a separate charge for shipping the product to the purchaser. Handling is generally a fee imposed by the seller to pay for administrative selling costs.</td>
</tr>
<tr>
<td>shipping_only</td>
<td>Charge for transporting tangible personal property from the seller to the purchaser. Documentation must be maintained that clearly establishes where title to the tangible personal property passed from the seller to the purchaser.</td>
</tr>
<tr>
<td>subscription</td>
<td>Subscription to a web site or other content.</td>
</tr>
</tbody>
</table>
